

Zxdc-Flox

Nomenclature	C57BL/6Smoc- <i>Zxdc</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Zxdc	Synonyms	BC003332, A930012H20, B930086F11Rik
	NCBI ID	80292
	MGI ID	1933108
	Ensembl ID	ENSMUSG00000034430
	Human Ortholog	ZXDC

Model Description

These mice carry loxP sites flanking target exons of Zxdc gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Zxdc gene.

*Literature published using this strain should indicate: Zxdc-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
