

Ccl21a-Flox

Nomenclature	C57BL/6Smoc- <i>Ccl21a</i> ^{em1(flox)Smoc}
Cat. NO.	TBD
Strain State	Developing

Gene Summary

Gene Symbol Ccl21a	Synonyms	ALP, SLC, plt, CKb9, Tca4, 6Ckine, Scya21, 6CKBAC2, SCYA21a, Scya21b, AW987545
	NCBI ID	18829
	MGI ID	1349183
	Ensembl ID	ENSMUSG00000094686
	Human Ortholog	CCL21

Model Description

These mice carry loxP sites flanking target exons of Ccl21a gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Ccl21a gene.

*Literature published using this strain should indicate: Ccl21a-Flox mice (Cat. NO. TBD) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data

No data
