

4932438A13Rik-Flox

Nomenclature	C57BL/6Smoc-4932438A13Rik ^{em1(flox)Smoc}
Cat. NO.	NM-CKO-225005
Strain State	Sperm cryopreservation

Gene Summary

Gene Symbol 4932438A13Rik	Synonyms	FSA; Tweek; Kiaa1109; 4732443H21; B830039D19Rik; D630029K19Rik
	NCBI ID	229227
	MGI ID	2444631
	Ensembl ID	ENSMUSG00000037270
	Human Ortholog	KIAA1109

Model Description

These mice carry loxP sites flanking exon 3-4 of 4932438A13Rik gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of 4932438A13Rik gene.

*Literature published using this strain should indicate: 4932438A13Rik-Flox mice (Cat. NO. NM-CKO-225005) were purchased from Shanghai Model Organisms Center, Inc..
